Subject: Proposed Combined-Cycle Power Plant in Elizabeth Township
Attachments: Invenergy AEC Air Quality Modeling Protocol 012119 FINAL.pdf

Tim,

ACHD staff members met on 1/4/19 with two members of Invenergy and two members of All4 LLC to discuss a proposed Combined-Cycle Power Plant in Elizabeth Township.

This is a continuation of a project that was slated for development in the Buena Vista section of Allegheny County around 2014, but got shelved until now.

The new site is within a few miles of the border to Westmoreland County and modeling impacts could potentially affect the airsheds outside of Allegheny County.

Attached is All4's Modeling Protocol, on behalf on Invenergy, to support major NNSR permitting for the proposed plant. ACHD would ask if you could assist in reviewing the protocol.

I have a question on the appropriate Eastern US NOx MERPs value to use for 8-hr Ozone, but I will send that in a second email.

Shaun Vozar
